

Dear Tagish resident,

Last fall, DataPath Systems conducted a survey on behalf of the Southern Lakes Resort concerning the maintenance and possible improvement of Ten Mile Road. The survey was aimed to get an idea of how the Tagish community would feel about a possible upgrade of Ten Mile Road.

One question asked whether Tagish residents would be willing to support improvements and maintenance of the road, either in-kind or with a cash contribution. This question quite unintentionally sparked some upset among Tagish residents.

Including the question in the survey was due to an unfortunate misunderstanding. This question was aimed solely at the immediate neighbours of the Resort who share the road with the Resort on a daily basis and who would benefit from improvements to Ten Mile Road. Due to the misunderstanding, this question was instead asked to all residents of Tagish.

It is important to the Resort to apologize to the community for the false impression this survey has created. The Southern Lakes Resort is aware that access to the resort is their sole responsibility and the Resort has never expected the community to contribute resources to road improvement.

Sorry for the inconvenience and the misunderstanding between ourselves and the Resort on the questions to include on the survey.

Donna and Mike Larsen
